

Impossible...

OILY and WET CONCRETE FLOORS

POINT1 LOWEST COST!

The most expensive cost component is labor, and the most expensive process is the preparation of the concrete surface to eliminate oils, moisture and debris.

4Ever Concrete Floor Paint was developed so that "ANYONE CAN DO."

Minimum surface preparation. **Only 1 coat. It's LOWEST COST !**

POINT2 Incredibly strong adhesion and durability.

Somay-Q's proprietary adhesion technology ensures incredibly strong adhesion that will not delaminate for years. Just one coating process only. Repels black tire marks.

Lowest cost solution by far.

■ Adhesion pull test

4Ever Concrete Floor Paint's adhesion was so strong that it cracked the concrete. The adhesion rating was 4N/m².

■ Adhesion delamination test

4Ever Concrete Floor Paint was painted over an oil-soaked substrate. Then a screwdriver was used to try to scratch off the coating. The competitor's coating delaminated easily. 4Ever Concrete Floor Paint did not delaminate whatsoever.

POINT3 Apply just 1 coat

■ Process

4Ever Concrete Floor Paint eliminated the difficult and time consuming processes.

It's LOWEST COST!

POINT4 Paint directly over oil soaked and even moist concrete

Somay-Q's proprietary adhesion technology forces oil and moisture out of the concrete and up to the surface of the coating.

Caution : Oily particulates and puddles of water must be removed before painting 4Ever Concrete Floor Paint.

POINT5 Paint directly over oil soaked and even moist concrete

4EVER Concrete Floor Coating GDR

- Apply just one coat only.
- Incredible adhesion. Will not delaminate.
- No prep.
- Unbelievable

Practical Coverage: 30 to 35 m²
 Dry time: 8 hours
 Volume: 10kg (Base/Hardener 5kg each)
 Mix ratio: 1 : 1 (by weight)

Apply on dry concrete floor or concrete floor with old paint film.
 Quick drying. Can walk on paint after 8 hours. (@20°C)
 Mix ratio 1:1 (by weight)
 Made possible by SOMAY-Q's proprietary adhesion and nano technologies.

4EVER Concrete Floor Coating FOP

Apply directly on oily concrete floor or concrete floor with old paint film.
 Quick drying. Can walk on paint after 6 hours. (@20°C)
 Mix ratio 1:1 (by weight)
 Made possible by SOMAY-Q's proprietary adhesion and nano technologies.

Practical Coverage: 30 to 35 m²
 Dry time: 8 hours
 Volume: 10kg (Base/Hardener 5kg each)
 Mix ratio: 1 : 1 (by weight)
